Company Profile

RomSoft was founded in 2001 as a software house. It is an independent company based on the experience of 15 years in software development, of the two owners: Dorin Cristea and Nicu Popescu. The company acts on the European market especially in the medical laboratories sector. The company is participating in some European funded projects (FP7) in partnership with famous companies. Our strategic advantages are the high standards in development & services with reasonable prices. That comes from the excellent quality of our human resources.

Goals, Fields and Forms of Cooperation

To provide cost-effective software development on high standards for the customers. Software companies that try to optimize their costs on software development projects. IT Consultancy for software houses that try to improve the quality of their products. Non-IT Companies that need to develop custom software projects. Companies interested about the Romanian and European markets
